

DIG INTO INTERVENTION: FRACTION ADDITION AND SUBTRACTION SKILL BOOSTERS

Presented by MathLinks Author
Mark Goldstein

For more information about our core programs for middle school and intervention programs for grades 6-9, please visit:

In this session, you will learn:

- How to design short practice routines to fill gaps for skills related to fraction operations.

PHILOSOPHY

Skill Boosters allow students to work on “holes” in their background without losing ground on current topics.

- Focus on whole and rational numbers
- Use of visual representations of mathematical ideas
- Short intervals (about 10 minutes in each session) are more to achieve fluency than concentrated work on one topic.
- Explicit and systematic instruction

From a meta-analysis from the What Works Clearinghouse

HOW TO CREATE SKILL BOOSTERS

1. Deconstruct into specific skills.
2. Create examples for each skill.
3. Make a pre/post assessment.
4. Create a schedule.
5. Write daily problems.
6. Establish an accountability plan.

DECONSTRUCT SKILLS FOR FRACTION ADDITION AND SUBTRACTION

Skill	diagram	mentally	compute
Add or subtract proper fractions	x	x	x
Subtract fraction from whole number	x	x	x
Add fractions	x		x
Subtract fractions	x		x
Locate fractions on a number line	x		

CREATE EXAMPLES FOR EACH FRACTION SKILL

CREATE A SCHEDULE

Skills rotation: Each week students practice four of the skills daily.

5 weeks	A	B	C	D (Review)
Week 1	Proper + or - (diagram)	Proper + or - (compute)	Fract + or - (mentally)	whole (mult) equiv (big 1)
Week 2	Whole - fract (diagram)	Whole - fract (mentally)	Fract + (diagram)	whole (div) equiv (mixed)
Week 3	Fract - (diagram)	Fract + (compute)	Fract + or - (mentally)	order of ops number lines (whole)
Week 4	Fract - (compute)	number line (fract)	Fract + (compute)	order fractions whole (div)
Week 5	Fract + (compute)	Fract - (Compute)	number line (fract)	equiv (big 1) notation

WRITE DAILY PROBLEMS

Example (Week 1): Write problems on board. Students do work in a notebook or on a provided template.

Wk 1	A	B	C	D (Review)
Day 1	Show with a diagram: $\frac{1}{4} + \frac{3}{4}$	Compute: $\frac{1}{4} + \frac{3}{4}$	Compute mentally: $1\frac{1}{4} + 3\frac{3}{4}$	Compute: 65(17)
Day 2	Show with a diagram: $\frac{5}{6} - \frac{1}{6}$	Compute: $\frac{5}{6} - \frac{1}{6}$	Compute mentally: $3\frac{5}{6} - 1\frac{1}{6} + \frac{1}{6}$	Find n: $\frac{3}{8} = \frac{n}{40}$
Day 3	Show with a diagram: $\frac{3}{4} + \frac{1}{2}$	Compute: $\frac{3}{4} + \frac{1}{2}$	Compute mentally: $2 + \frac{3}{4} - 1\frac{1}{4}$	Compute: (805)(3020)
Day 4	Show with a diagram: $\frac{1}{2} - \frac{1}{3}$	Compute: $\frac{1}{2} - \frac{1}{3}$	Compute mentally: $2\frac{1}{3} + 6 + 5\frac{2}{3}$	Write in simplest form: $\frac{90}{60}$

Same problem type daily for about a week

FOLLOW THE SCHEDULE

Skills rotation: Each week students practice four of the skills daily.

5 weeks	A	B	C	D (Review)
Week 1	Proper + or - (diagram)	Proper + or - (compute)	Fract + or - (mentally)	whole (mult) equiv (big 1)
Week 2	Whole - fract (diagram)	Whole - fract (mentally)	Fract + (diagram)	whole (div) equiv (mixed)
Week 3	Fract - (diagram)	Fract + (compute)	Fract + or - (mentally)	order of ops number lines (whole)
Week 4	Fract - (compute)	number line (fract)	Fract + (compute)	order fractions whole (div)
